Opioid Epidemic and ERAS

Philip Corvo, MD has had (2) recent talks on the use reduction of Opioids in surgery and how multi-modal pain management is part of the ERAS (enhanced recovery after surgery) initiative. Listen below to the July 27, 2016 Medically Speaking at St Mary's Hospital WATR talk:

Opioid overdose is a medical emergency and emergency services should be called immediately. Treatments include medications like naloxone that reverse the effects of opioids. A breathing machine can help if breathing is impaired.

Ages affected
